In The Claims:

Please amend the claims as follows:

1. (Amended) A porous, flushable, ductile, breathable film, wherein the film is formed from an extruded precursor film, the extruded precursor film comprising a homogeneous blend of a water-soluble polymer and a particulate filler, wherein the filler comprises at least 10 percent by weight of the precursor film, and the precursor film having an elongation-at-break of greater than about 150%, further wherein the precursor film, when stretched, forms pores around the particulate filler thereby increasing the breathability of the breathable film.
